WHY MAKE A WILL

Making a Will is one of the most important steps you can take to protect the people you care about and to ensure your wishes are followed after your death.

Yet many people delay making a Will, often assuming it is something they can deal with “later”. The reality is that not having a Will can create unnecessary stress, uncertainty, and cost for those you leave behind.

Making a Will is about taking responsibility, protecting your family, and ensuring your voice is heard. Whatever your age, wealth, or circumstances, having a Will in place gives peace of mind today and certainty for the future.

- A Will gives you control. It allows you to decide who inherits your money, property, and personal belongings.
- You can nominate who should receive your personal possessions to avoid unneccessary confusion between your loved ones.
- A Will also allows you to choose who will deal with your estate by appointing Executors you trust.
- It reduces the likelihood of misunderstandings, arguments, or legal challenges.
- It allows you to provide appropriately for vulnerable or disabled persons, as well as minor children.
- If you have children under 18, a Will is the only way to formally appoint Guardians.

CASE STUDY | NO WILL, NO LEGACY

When David died suddenly at 58, he had no Will in place. He had two adult children, Emma and Jack from his first marriage and was married to Sarah at the time of his death, his second wife.

David had always told his children that they would “definitely get the house one day”. Emma & Jack assumed that their Dad had made the necessary arrangements and taken care of it. However, because David had not made a Will, his estate had to be distributed under the standard intestacy rules.

Under those rules, David’s estate was distributed in a way that did not likely reflect his wishes. His house and all of his savings went to his second wife, Sarah.

This led to tension and distress within the family at an already difficult time.

After David’s funeral, Emma and Jack never saw Sarah again. They believe their Dad wanted them to inherit but suspect he simply never got around to putting a Will in place and formalising his wishes.

– A simple Will could have protected David’s wishes and prevented this outcome, but without one, the law decided instead.
